

Feedback as Control Mechanism

Name: Saptarshi Kar

Enrolment ID: ADTU/1/2025-28/BCAO/054

Subject: Fundamentals of Management

Department: Faculty of Computer Technology

Introduction to Feedback in Management

- Feedback helps in evaluating performance
- Helps identifying errors and correct them
- It is an important part of management control

Feedback as Control Mechanism

- Compares actual and expected results
- Identifies deviation from expectation
- Helps improve system stability
- Supports continuous improvement

Types of Feedback

Type	Purpose
Positive Feedback	Reinforces good performance
Corrective Feedback	Helps identify problems
Formal Feedback	Structured evaluation
Informal Feedback	Casual suggestions

Case Study - File Upload System

Project Overview:

- File upload management system
- PHP & MySQL based

Issues Identified:

- Image upload errors
- Image preview bugs

Feedback Recieved:

- Formal feedback from testers
- Informal feedback from users

Improvements:

- Improved file validation
- Fixed preview window and improved stability

Conclusion

- Feedback helps control and improve a system
- It helps in better decision-making
- Feedback is important in both management and technical projects

“Continuous feedback is the key to effective management and system improvement”

Thank You
